Criterion 7 Institutional Values & Best Practices

7.1 Institutional Values and Social Responsibilities

7.1.2: The Institution has facilities and initiatives for:
Water conservation

3. Water Conservation Strategies:

Institute has taken the number of initiatives for water conservation:

3.1 Rain water harvesting:

- Rain water harvesting is an important method used to recharge the bore well.
- Rain water is used as distilled water in the chemistry Laboratory.
- Rain water harvesting help to rise water level in the ground.
- Institute has tried to avoid the concrete surface in the campus for rain water harvesting.

- **Rain Water harvesting:-**

Rain Water harvesting is an important initiative to store the water. Rain water stored in Underground by well planning. Institute Save the rain water in the ground by rain water harvesting projects. This is due to raise the ground waterlevel.

Practice:-

Institute installed rain water harvesting System. The roof rain water and drinking water waste is Collected through pipe line and Collected in the Constructed tanks. The Collected water percolates in Underground. So that it help to rise level of water.

3.2 Borewell Recharge:

This method is useful for recharge bore well. Around the bore well, we made natural filter made up by Sand and small stones.
